Definitions of Kinks and Fetishes

Foundations

Petting - kissing, caressing, and other sexual activity between partners that does not involve sexual intercourse e.g. touching Your Partner Penis or Pussy during Kissing.

Cunnilingus - a sexual activity in which the female genitalia (vagina) are stimulated by the partner's lips and tongue.

Handjob - stimulating Your partner penis with Your hand, usually resulting in ejaculation.

Blowjob - the activity of giving sexual pleasure to Your partner by using the mouth on his penis.

Vanilla Sex - Sex that involves no kinkiness. Basically plain regular sex in Missionary Position. Typically sweet and romantic.

Fingering - Fingering is when male Partner uses their finger(s) or hand to stimulate female Partner's vagina.

Use Your Fingers!

Fingers Sucking - Known as a finger blowjob, is where someone performs the act of a blowjob on one of their, or someone else's, finger(s).

Ass Fingering - The act of a man or woman sticking their fingers in their anus and beginning to move them in and out like they would during sex .

Prostate Fingering - A type of massage used for sex called "prostate fingering" aims to stimulate a special ejaculatory response and potentially lead to prostate orgasm. This usually leads to a thin stream of milky fluid leaking from a man's penis. Prostate orgasms tend to be more full-bodied instead of localized to a man's genitals.

Tickling - In BDSM groups, tickling is a typical activity where the erotic tickling experience involves sensory play and bondage. Another popular practice is "tickle torture," in which the victim is bound and cruelly tickled with little chance of escape.

Kiss Me!

French Kisses - The French kiss, also referred to as a makeout, combines tongue and open-mouth kissing. Though most individuals try to avoid using too much tongue in this situation, some people prefer wet, open-mouthed kisses.

Lizard Kiss - A lizard kiss is when two people kiss just with their tongues—never their lips.

American Kiss - An American kiss, just like a French kiss, involves deep kissing but without the use of tongue.

Ice Kiss - Keep an ice cube in your mouth until it melts and then French kiss your partner. You can also try to swap an ice cube between your mouths during kissing.

Spiderman Kiss - Kissing your partner upside down, with your top lip touching their bottom lip and vice versa.

Drink Kiss - One of the partner takes a sip of their favorite drink into your partner's mouth while kissing. Guess, there's another way of getting drunk with your partner.

Cold Kiss - The act of a man taking a cube of ice between his lips and rubbing it on a woman's vagina.

Taking Control of...

Orgasm - Orgasm control can mean any of several sexual activities involving forcing, denying, postponing, or extending orgasm, sometimes in combination with all of these.

Outfit - The Dominant chooses what the submissive wears—at home, in public, or under their clothes. It may involve lingerie, sissywear, embarrassing clothing, or strict dress codes.

Punishment & Reward Chart - This is a task chart for a submissive partner. Depending on how many tasks sub completes, he/she gets a punishment or a reward (previously agreed). You can find such a chart in our G&J Passionate Press Store.

Stuckage - The act of someone becoming stuck or trapped in whatever way. For example, windows, doors, holes, chairs, washing machine doors, etc.

Blackmailing - Sort of blackmail in which a person threatens to publish a film or picture of you in a naked or sexual pose if you don't comply with their requests. Great and only for roleplaying scenarios.

Corruption - Refers to the loss of morality, characterized by a person starting pure and then becoming depraved in some way, typically ending with them being evil, slutty, or some combination of the two. Great and only for roleplaying scenarios.

Feminization - Reversing gender roles and making a submitting partner—typically a man—take on a feminine role is a practice known as femininization in dominance and submission or kink subcultures. This is commonly done for the purpose of humiliation-based pleasure.

Immobilization - The person will become physically immobilized; this can happen through several means, such as trapping or suppression, but it usually happens through heavy bondage or mummification from BDSM.

Servitude - In BDSM, servitude refers to performing personal tasks for their dominant partner, as part of their submissive role in a BDSM relationship.

Hypnotizing - When used in BDSM, sexual hypnosis is usually associated between a dominant and a submissive. One person is being hypnotized while the other is hypnotizing. Sexually hypnotic sound recordings can also be used for this. Great and only for roleplaying scenarios.

Stalking - Things that can be part of stalking include: following a person, watching or spying on them, forcing contact with them, etc. Great and only for roleplaying scenarios.

Sensory Deprivation - One type of sensation play that is frequently included in BDSM is sensory deprivation. It involves taking away one or more of a person's senses, such sight and hearing. Their other senses, such as touch, become more sensitive to stimuli as a result, adding to their sensation of helplessness. This may lead to a really sexual experience. Our recommendation is to tie up your partner, put a blindfold and headphones on their ears, and put on a ball gag. In this way, you can have sex with your partner, give her pleasure with a vibrator, or swap the ball gag for an open-mouth gag and have oral sex.

Claustrophilia - The sexual excitement brought on by being confined to a small, enclosed place is known as Claustrophilia. For some people, the feeling of being physically imprisoned can result in sexual fulfillment. Sex in closets or airport restrooms can suffice to engage in claustrophilia, although as some get more advanced in the kink, devices such as vacuum beds, coffins, cages, and confinement spaces can be helpful.

Daily Rituals - Repetitive tasks or behaviors a submissive performs daily to reinforce obedience, structure, or devotion—like morning texts, kissing feet, or journaling tasks completed.

Phone Access - The Dominant controls when, how, or if the submissive is allowed to use their phone. It can include full phone control, monitoring, or permission-based access.

Taking Control of...

Bathroom Permission - The submissive must ask for permission before using the toilet. This reinforces control and creates a sense of dependency and humiliation.

Behavioral Training - A long-term method to shape the submissive's attitude, responses, and manners - includes posture training, speech restrictions, gratitude practice, or obedience drills.

Location Updates - The submissive sends real-time updates on their whereabouts throughout the day or the dominant has permanent access to the submissive's location. It's a control practice often paired with rules about movement and time tracking.

Forced Dressing - The Dominant forces the submissive to wear specific items of clothing or accessories - often as punishment, blackmail, or for humiliation. It can include hoods, gags, collars, lingerie, or anything else chosen and applied against the submissive's will.

Silence Training - The submissive is instructed to remain silent for a set period of time, often as punishment, obedience training, or part of public play to test self-control.

Daily Sex Tasks - A submissive is given daily sexual assignments (e.g., masturbation, denial, edging, rituals) to perform as ordered. These tasks may vary in intensity or purpose.

Camera Monitoring - The submissive is observed via camera during tasks, daily routines, or obedience training. It may include live streams, photos, or video reports to ensure submission.

Tasks sent by phone - The Dominant sends tasks or instructions via phone messages. These can be spontaneous or scheduled and are expected to be followed immediately or by a given deadline.

Time Control - The Dominant manages how the submissive uses their time - setting wake-up hours, work/study sessions, breaks, or punishment for delays and procrastination.

Open Your Mouth...

Deepthroat - Deep-throating occurs when, during a blow job, the Partner puts as much of the penis as they can in the woman's mouth, sometimes the whole thing.

Swallowing - When a woman gives a blowjob to her Partner and then swallows the cum down the throat.

Facial - When a man ejaculates onto his Partner's face.

Facesitting - Also known as queening, is a sexual practice in which a woman sits on or over the Partner's face, typically to allow or force oral-genital or oral-anal contact.

Golden Shower - People who enjoy this kink get aroused by pissing on their partner's body as part of foreplay. Some people prefer the opposite - they love when their Partner pisses on them.

Face-fucking - Act of putting the penis into Your Partner's mouth. It's similar to oral sex, but the female Partner doesn't move her head in this case. She takes a relatively passive role with an open mouth and her partner moves your head back and forth.

Gagging with Toys - The Dominant uses sex toys (like dildos or strap-ons) to intentionally make the submissive gag during oral play. This act emphasizes control, discomfort, and submission.

Drooling Play - The submissive is encouraged or forced to drool—often due to a gag, prolonged oral use, or intentionally messy blowjob—as a way to emphasize humiliation and loss of control.

Oral in Public - Oral sex is performed in semi-public or risky settings (like cars, fitting rooms, or secluded areas), adding a thrill of exhibitionism, fear of getting caught, and obedience under pressure.

Mint Oral Sex - A distant and more exotic cousin of the standard "Blowjob" where the giving partner gives the receiving partner oral sex with a peppermint, spearmint, or any other type of menthol candy in their mouth.

Chocking on a Dick - The submissive is pushed so deep during oral sex that it causes choking—intentionally triggering a gag or even tears. This act emphasizes total control, face-fucking, and often humiliation.

Forced Oral Sex - A rape fantasy involves imagining or pretending to be coerced into rough oral sex.

Gagging with Fingers - The Dominant pushes fingers deep into the submissive's mouth or throat to trigger the gag reflex, symbolizing ownership, power, and degradation.

Oral on Display - The submissive is made to perform oral sex while being watched or filmed—or positioned in a way that exposes the act visually, heightening the feeling of objectification and vulnerability.

Sloppy Blowjob - A deliberately wet, messy, uncontrolled blowjob that includes excessive saliva, drooling, gagging, and face smearing - meant to degrade and arouse through visual intensity.

(B)all Gags

Ball Gag

A rubber ball that is attached to a collar and is used for the man or woman to bite or suck on during sexual activity

Droll Gag

A gag (usually oversized ball gag) designed to force the mouth open and encourage uncontrollable drooling. Perfect for messy, degrading submission play.

Pacifier Gag

A pacifier is a gag simply by design and, within the BDSM sphere, is typically used in ABDL, ageplay, DDLG or humiliation play. The pacifier is one of the less 'harsh' variations of a mouth gag.

Ball Gag with Breathing Holes-

A classic ball gag modified with small air holes to allow easier breathing. It restricts speech while keeping the submissive safe during long sessions or intense play.

Ball Gag with Head Harness -

A ball gag attached to a full head harness that tightly secures the mouth and sometimes includes straps around the chin or forehead. Used for extreme control, immobilization, and visual humiliation.

Bit Gag -

Bit gags are styled after the mouth bits found in horse bridles and are typically identified by the bar placed in the wearers mouth. Similar to a ball gag, the bit is placed behind in the mouth of the wearer, behind the teeth.

Open mouth gag- A gag that keeps the submissive's mouth wide open, without blocking the entrance. Allows for unrestricted access (e.g., oral, spit, insertion), making the sub feel helpless and exposed.

Tape Gag - A simple but effective gag where tape (duct tape, bondage tape) is used to seal the submissive's mouth shut. Often combined with stuffing and used for raw, helpless silence and restraint.

(B)all Gags 2

Inflatable Ball Gag - The dildo itself is made of rubber that's thick enough to take a beating without deflating at the end of it all. There's also a quick deflate button on the pump so you won't have to worry about giving your partner more than they can handle.

Funnel Gag - The funnel gag gets its name from the funnel and tube that leads into the wearers mouth, usually used to force the wearer to drink a fluid. It is strapped to the wearers head and both the style of funnel and straps can vary in elaborateness. These gags should be used with caution as there is a heightened risk of choking during such forced drinking.

Muzzle Gag - A gag that covers the entire lower part of the face, often with straps or padding. It restricts both speech and jaw movement, creating a sense of animalistic control or dehumanization.

Panel Gag - A ball gag with an added flat leather or rubber panel over the mouth, giving a smooth, silenced look. Often used for stricter restraint and added humiliation through visual submission.

Tube Gag - A gag with a hollow tube in the center, allowing air, spit, or even fluids to pass through. Often used for fluid play, breath control, or controlled feeding.

Pussy-Face Gag - A strap-on gag shaped like a vulva, worn on the submissive's face with the "pussy" positioned at mouth level. Used in humiliation play.

Gag Hood - A full hood that includes an integrated gag (ball, penis, or stuffing). It removes identity, limits senses, and enforces total submission - often used in intense BDSM or sensory deprivation scenes.

(B)all Gags 2

Ball Gag with Nipple Clamps A ball gag connected via chains to nipple clamps. Any head movement pulls the clamps, combining mouth restraint with nipple torture to increase obedience through pain.

Face Mask with Ball Gag A gag built into a face mask that fully covers the lower face. It amplifies control, objectification, and silence—ideal for long-term wear and psychological domination. Great for public play.

Cum Play

Cum Milking - The practice of removing excess semen from the urethra after ejaculation, usually by applying pressure beginning just forward of the scrotum and moving up towards the head of the penis.

Soft Cum Facials - The act of cumming directly onto woman's face, typically into an open mouth or across the cheeks and / or lips.

Snowballing - The act of receiving cum into mouth, transmitted from a woman's mouth, or french kissing while sharing a load of cum between one another's mouths.

Cum Spitting - If your partner cum in your mouth then instead of swallowing the cum you spit it out.

Fake Cum - Fake cum is perfect for Squirting dildo, Facial Fun, Creampies, Breeding Kink and any other. You can easily find a recipe on the Internet and do it yourself very fast.

Cum from Condom - Using the sperm from the condom for further play - such as eating it, getting it poured on the face, body, etc.

Cum Marking - The act of cumming onto a submissive with the intent for the scent or sight of the cum to work as a proprietary mark, sometimes for extended or permanent periods of time, or receiving such actions. For example, cum on clothes and leave a sperm stain.

Cum in Mouth with Gag - The submissive is made to wear a gag (like an open-mouth or ring gag) while the Dominant ejaculates directly into their mouth. This emphasizes control, objectification, and total access.

CEI (Cum Eating Instructions) - The submissive is required to eat semen—either their own or the Dominant's - following explicit instructions. Often used to enforce humiliation, obedience, or training in extreme submission.

Cum in Jar - The submissive is ordered to collect their own ejaculations in a jar over time. This can be for humiliation, measurement, ritual use, or to reinforce control and restraint between sessions.

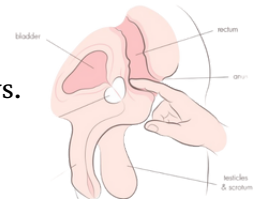

No Wiping Rule - After ejaculation—on the face, chest, or body—the submissive is not allowed to wipe or clean up without permission. It reinforces humiliation, submission, and ownership.

Icy Nipple Play - The Dominant uses ice cubes, cold metal, or frozen objects to stimulate or shock the nipples. The sudden cold intensifies sensitivity and submission through contrast and discomfort.

Roles & Preferences

Submissive - Submissives like to follow. Some like to give the control away to their partner(s), some like to have it forcibly taken from them. Some are submissive only in the bedroom, others are submissive throughout their daily life as well (usually with limitations).

Dominant - Dominants like to be in charge. Some like to have their partner obey them without questioning, others like some resistance while taking it their way. Some are dominant only in the bedroom, others are dominant throughout their daily life as well. Unlike the top roles (giving pain/bondage/degradation), being dominant is more about who decides what happens (and takes the responsibility that comes with it) than about the contents of what happens.

Master/ Mistress - Masters/Mistresses receive complete control over the life of their slave(s), and all responsibilities that come with it. They go a step further than dominants in the sense that their power exchange is present 24/7 and in all aspects of their life (except for negotiated exceptions such as during their office jobs). Their primary focus is to create a stable and safe environment for their slave, to allow optimal servitude.

Slave - Slaves completely hand over the control and responsibilities over their life to their master/mistress. They go a step further than submissives in the sense that their power exchange is present 24/7 and in all aspects of their life (except for negotiated exceptions such as during their office jobs). Serving their master/mistress is their primary focus in life and they rarely have limits for them.

A Top - A top is someone who prefers to be the person in control during sex. Tops generally prefer to take a more active role in sex by acting as the person who penetrates, gives oral sex, or does other sexual acts.

A Bottom - Bottoms typically like to receive during sex, whether that means oral sex, being penetrated during sex, or other sexual acts.

DDLG - DDLG, or DD/LG, is an acronym for daddy dom/little girl, a sexual relationship where the dominant male is the daddy figure and a woman plays the role of a young girl.

MDLB - is an acronym for mommy dom/little boy. It's when during the sexual intercourse, a female acts as a dominant "mother", while the male is roleplaying a submissive "little boy".

Degrader - Degraders like to degrade and humiliate their play partner(s), either by acting upon them in a degrading way, or by or by forcing them to do things they consider degrading.

Degradee - Degradees like to be degraded and humiliated by their play partner(s), either by being acted upon in a degrading way, or by being forced do things they consider degrading.

Rigger - Riggers like to tie up and restrain their partner(s), using rope and/or other attributes (chains, cuffs, spreader bars, etc.). Whether for sexual enhancement, for art or just for fun, they enjoy having their partners completely at their mercy.

Rope Bunny - Rope bunny likes to be tied up and restrained, using rope and/or other attributes (chains, cuffs, spreader bars, etc.). Whether for sexual enhancement, for art or just for fun, they enjoy being totally at the mercy of their partner(s).

Brat - Brats are, in essence, naughty submissives. They find disobedience a form of playfulness rather than letting their dominant down, and require a compatible dominant who will not only teach them a lesson, but also accept that any number of lessons might still not necessarily change this behavior.

Brat Tamer - Brat tamers are, in essence, dominants who enjoy handling bratty submissives. They find disobedience a form of playfulness from the side of the submissive, rather than a form of rudeness. They will take no offence to it, but will still teach the sub a well deserved lesson (because, of course, that is why the bratty sub shows such behavior in the first place).

Owner - In BDSM, a pet owner is a Dominant who looks after the person playing as a cat, dog, pony or other animal.

Pet - A pet is a submissive enjoy taking on the role of an animal and being completely controlled. They enjoy pretending to be an animal to please their Owner.

Sadist - Sadists enjoy inflicting (certain types of) pain on their partner(s), usually in a sexual context.

Masochist - Masochists enjoy receiving (certain types of) pain from their partner(s), usually in a sexual context. Masochism is independent of pain tolerance: it is purely about the ability to enjoy (or get aroused by) certain levels of pain.

Roles & Preferences

Primal Hunter - Primals are mainly focused on their natural instincts and they enjoy letting their inner animal out during sex. The key part for primals play is that the participants show their raw, emotional sexual feelings during play. All of the labels, roles, and protocols go out the window, and the prey can become a snarling, growing, clawing animal hell-bent on getting away from its predator (you).

Primal Prey - Primals are mainly focused on their natural instincts and they enjoy letting their inner animal out during sex. The key part for primals play is that the participants show their raw, emotional sexual feelings during play. All of the labels, roles, and protocols go out the window, and the prey (you) can become a snarling, growing, clawing animal hell-bent on getting away from its predator.

Switch - Switches like to... switch. Always taking a dominant or top position is not for them, neither is always taking a submissive or bottom position.

24/7 - 24/7 means 24 hours a day, 7 days a week. In BDSM it means the power exchange relationship occurs on a full-time and often live-in basis. We recommend trying this as a SUB/DOM role with commands and sex toys for a day or few.

Findom - Financial domination (also known as findom) is a fetish lifestyle activity in which a submissive is required to give gifts or money to a dominant. It is usually associated with female domination (femdom).

Age Difference - This is a person who likes a big age difference between themselves and the other person, usually around 10 years or more. Typical examples are a mature woman and a young man, or vice versa. Just as our age is out of our control, however, during a roleplay session we can imagine that we and the partner are different ages, which will be ideal for people who like an age difference kink.

Service Submissive - A submissive who finds fulfillment in acts of service—like cleaning, organizing, assisting, preparing food, or running errands. Obedience is shown through devotion and helpfulness.

Disciplinarian - A Dominant focused on correction, structure, and punishment. Their power dynamic is built on rules, consequences, and training - not just pleasure, but consistent behavior control.

Domestic Submissive - A submissive who thrives in household obedience—serving meals, cleaning, dressing their Dom(me), and maintaining the home. A lifestyle kink, often rooted in 1950s dynamics or high-protocol D/s.

Fantasy-Only Dom/Sub - A dynamic based on roleplay or kink scenes, without 24/7 submission. The Dom/sub roles exist mostly in the bedroom or during specific scenarios, not in everyday life.

Non-Verbal Submissive - A submissive trained or instructed to communicate only non-verbally - through gestures, posture, or written notes. Used to increase tension, control, and focus on body language or silence.

Exhibitionist - A submissive who becomes aroused by being seen or exposed - whether physically, emotionally, or sexually. Public play, visible marks, or performance scenarios are common.

Obedience-Driven Sub - A submissive who is primarily motivated by following commands and making their Dominant proud. Their satisfaction comes from hearing "good girl/boy" and meeting strict standards.
